Welcome!

ATTACHMENT

- Rules for the Nordic Junior Meeting

The Nordic Junior Meeting in Ski Orienteering (in short NJM) is an unofficial event between the National Orienteering Federations in the Nordic and Baltic countries and is also open to Federations from other countries.

The Nordic Junior Meeting shall follow the the latest Competition Rules for Ski Orienteering Events set by the International Orienteering Federation (IOF) unless otherwise stated in these rules:

Principles for Nordic Junior Meeting

The event shall be organised in accordance with the following principles:

- The event is a competition between the different nations over two competitions
- The participants represent their nation and are collecting points for their nation
- The event shall have a social, rather than a competitive atmosphere letting young people exchange experience and find new friends.
- The costs of participation shall be kept low.

Event programme

The event shall consist of two individual, single race competitions over two consecutive days and shall preferably take place earlier in the season than the Junior World Ski Orienteering Championships.

Participation and classes

Each federation may enter a maximum of 3 competitors to represent in each of the four categories: M18, W18, M20 and W20. Thus, in total there can be 12 competitors representing the nation. The same competitors represent the nations in both competitions. The organiser sets the entry deadline for the nominated competitors before the start of the first competition.

Other competitors may enter to take part in the same races, but only the pre-nominated competitors will count in the point calculations for the Nordic Junior Meeting.

Starting order and winning times

The starting order shall be drawn at random in both competitions. One of the competitions can be organised as a mass-start.

The winning times shall follow the rules for the M20 and W20 in IOF Junior World Ski Orienteering Championships.

Point calculations

In the Nordic Junior Meeting the nations collect points from all four categories both days.

The results of the two best competitors in each category from each nation are counting.

1. The nation's score is the total score of how many points their competitors have collected over the two competition days.
2. Only the two best placed pre-nominated competitors from each nation shall be considered in the point calculation. (This means the nation's third ranked athlete in each category will not be counting this day. For example, if one nation takes all the top 3 places in one category, only the two best of them will get points and the next ranked competitor from another nation will take the points for third place.)
The counting competitors from the nations can change for the two competitions
3. The best six best counting competitors in each category can obtain points for their nation as follows: 7,5,4,3,2,1
4. If two or more competitors share a place in a competition, they all receive the higher point score, i.e. if there are two competitors on place 3, they get 4 points each and the next on the result list will be on place 5 and will get 2 points.
5. The points are added up for all 4 categories both days, making it a maximum of 16 scores counting for each nation in the Nordic Junior Meeting results.
6. In case of equal total scores, the best single score decides, then the second best, then the third best etc.

Prizes

A trophy will be awarded to the winning nation.
